The lined out reference on the 1449 form was misidentified.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1,2 and 4-7 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is drawn to a "composition", yet later includes "being used in a manner" language. Is the claim a composition claim or a process claim? If a composition, then the later language is confusing and should be eliminated or changed to a future intended use (eg "for use in ...."). A proper process claim must include some definite step.

Claim 5 and 7's "comprises a cryogenic liquid seal" is unclear. Does a cryogenic liquid need be present? What is its spatial relationship to the previously described seal element? What are the minimum requirements to meet "cryogenic liquid seal"?

JP2003261850 does not qualify as prior art. JP06306340 shows adhesives for bonding NBR to metal which contains resole resin, NBR and chlorinated polyethylene. This reference appears to lack the polymer from bis(alkoxymethyl) benzene or bis(alkoxymethyl) bisphenyl. There is not any clear reason of record to include such a polymer in the reference adhesive.
